MBA – PGPEx Batch of 2027

CAREER SUMMARY

AI-led transformation professional with 5.5 years of experience across Deloitte USI and TCS in Healthcare and BFSI, specializing in AI discovery, solutioning and enterprise process transformation. Experienced in building Agentic AI and RAG-based Proof-of-Value prototypes using Claude, MCP and Dify, translating business challenges into scalable solutions and measurable ROI. Skilled in process mapping, root cause analysis and stakeholder management across global clients.

KEY-COMPETENCIES

AI Discovery & Solutioning | Technical Pre-sales | Proof-of-Value (PoV) | Business Case & ROI | Value Realization & Adoption | Agentic AI & RAG | Process Mapping & Root Cause Analysis | Supply Chain & Finance Use Cases | Executive Stakeholder Management

WORK EXPERIENCE — 5.5 YEARS

Consultant – Deloitte USI – Bangalore	**August 2024 – April 2026**
AI & Solutioning	• **Agentic AI Proof-of-Value**: Built a Claude AI + MCP Agentic AI prototype using tool/function calling to automate repetitive ETL development tasks, **targeting 50% effort reduction** and developing a business case for enterprise adoption. • **Value Realization & Adoption**: Designed a reusable cross-environment UAT automation framework adopted across 5 projects, **cutting testing time by 40%** and delivering repeatable value (Deloitte Spot Award 2026).
Client Advisory & Alliances	• **Stakeholder Management**: As the client's day-to-day contact, led recurring governance calls, cleared data-quality blockers and **secured milestone sign-offs**, strengthening the client relationship. • **Oracle Co-sell Solutioning**: Translated client requirements into technical recommendations and contributed to joint go-to-market discussions.
Delivery Excellence	• **Transformation Delivery**: Led a 3-person team to modernize a US healthcare program, migrating 7.2 TB from Oracle to GCP, **cutting development cycle time from 6 to 4 weeks (33% faster)**. • **Project Governance**: Ran two-week sprints with **85%+ sprint-commitment delivery**, tracking milestones and escalating blockers. • **Supply Chain Analytics**: Digitized hospital procurement monitoring with pipelines and a vendor-KPI dashboard, enabling early issue detection and a **2% reduction in losses**.
Capability Building	• **Talent Enablement**: **Upskilled 3 associates** on data engineering standards through weekly sessions, accelerating onboarding.
System Engineer – TATA Consultancy Services – Bangalore	**February 2021 – July 2024**
Digitization and Automation	• **Compliance Digitization**: Eliminated Excel-based **compliance risk by building 20+ Power BI dashboards** tracking DDO usage for a major Australian bank.
Optimization	• **Root Cause Elimination**: Applied root cause analysis to recurring liquidity ETL rerun failures for a major Australian bank and redesigned the pipelines, **saving AUD 72K annually and cutting daily runtime to 5 hours**.
Regulatory & Compliance	• **Capital Overlay Removal**: Streamlined liquidity-reporting file generation and ELT pipelines per PwC audit, contributed to removal of a regulatory capital overlay and a **40% cut in manual effort**.
Enablement	• **Process Mapping**: Mapped legacy banking processes, dependencies and data flows, applying root cause analysis to optimize liquidity reporting workflows and **accelerate project delivery by 25%**. • **Change Management**: Led client workshops and knowledge-transfer sessions to drive adoption and stakeholder alignment, enabling **around 5 new joiners** to become independent contributors.
Executive Electrical Engineer – MRF Tyres – Hyderabad	**November 2020 – February 2021**
Manufacturing Exposure	• Gained manufacturing process-flow exposure on the tyre-curing line at India's leading tyre manufacturer.

ACADEMIC ENGAGEMENTS (IIM MUMBAI)

Projects & Case Competitions	
Intel	• Developing an **agentic Generative AI (LLM) simulation** for Intel to forecast AI-driven compute demand and support multi-year capacity planning, resource allocation and strategic decision-making.
Dify RAG Chatbot	• **RAG chatbot**: Built an intelligent invoice assistant on **Dify** using a **vector database**, prompt engineering and retrieval rules to match invoice rules, extract the right data and help customers resolve queries.
Product Management	• **1st Runner Up** – Product Paradox Case Competition, BITS Pilani (Pilani campus)

SKILL AND TOOLS

AI & GenAI: Agentic AI, RAG, LLM Orchestration, Prompt Engineering, MCP, Function Calling, Dify, Claude AI
AI Solutioning: AI Discovery, Proof-of-Value, Technical Pre-sales, Business Case Development, ROI Analysis, Solution Demonstrations
Process Transformation: Process Mapping, Root Cause Analysis, Process Optimization, Supply Chain Analytics, Financial Processes
Technical: Python, SQL, BigQuery, Oracle ADW, Power BI, ETL, CI/CD, Jira, Confluence

CERTIFICATIONS

Lean Six Sigma Green Belt (KPMG), 2026 | AI for Business (Coursera), 2026 | Supply Chain Analytics, 2026 | Agile, 2022 | Power BI, 2021

CAREER HIGHLIGHTS

- **Deloitte Spot Awards** 2026 & 2025: Cut testing time via a UAT cross-environment framework (2026); reduced manual effort and errors by automating data migration (2025)
- **TCS Star Performer** 2023: Delivered a critical project ahead of schedule by managing client communication effectively throughout execution

SCHOLASTIC RECORDS

2020	B.Tech (EEE)	Cochin University of Science and Technology	9.46/10
2016 / 14	Class XII / Class X	Jesus and Mary Academy / Darbhanga Public School (CBSE)	91.2% / 10/10
